Look here, Mr. Orchardist,

that crop has cost you a whole lot of anxiety. Your weather eye has been watchful day and night, fearing for its safety.

And now that it's safely harvested, are you going to let up on your vigilance? How about the safety of the proceeds?

When you harvest your dollar crop, store it in this bank.

Then you may rest assured it is absolutely secure.

Congregational Church

"The Friendly Church just around the Corner."

Next Sunday is the Sunday just before Labor Day, and as usual for some years, the Pastor will have a special theme. This time he will speak on "*The Golden Guild of Workers*," a lesson from Nehemiah, the Master Builder of Olden Time. Sunday-school and Endeavor as usual.

A treat is ours for the evening when Dr. Kinnear of China will speak. Dr. Kinnear has spent many years in the Orient and is a recognized authority on things and conditions there. Come and bring your friends as this is a fine opportunity to hear from this first hand authority.

The Pastor has planned what promises to be a most helpful series of mid-week topics in September, "Great Early Morning Scenes with the Master." Every Wednesday night in Sept.

You are cordially invited to worship with us at any or all of our services.

GEO. E. ATKINSON, Pastor.

Farmers Union are sole agents for the wonderful Wizard Fertilizer.

Furnished housekeeping apartment for rent. Enquire Mrs. M. J. Wilson, 136 Campbell Ave.

Miss Vera Fablinger returned Tuesday from Chicago where she has been taking special work at Cook County Hospital. She brought with her aunt, Mrs. Theresa Coates of North Jandson, Indiana and Mrs. Coates' daughter, Pearl, of Chicago. Mrs. Coates is a sister of Vera's father, James Fablinger. They had not met each other for forty-two years. The Coates family will be in Campbell a few days and will then take in the Exposition, after which they will return East by way of Southern California.

Military Rats.

An old military dictionary tells us that rats were sometimes used in war for the purpose of firing powder magazines by means of lighted matches tied to their tails. We cannot offhand recall any historical instance of this, but presumably it did occur, seeing that Marshal Vauban laid down special rules for counteracting it. Anyhow, the dodge is as old as Samson, who, you may recall, used foxes in a similar way for a somewhat similar purpose.—London Standard.

Local and Personal

SMITH SELLS STATIONERY.

"*The Quality Shop*" *that's us, KING'S.*

Wizard Fertilizer is four times the strength of others.

Mrs. L. Genasci is spending the week at the exposition city.

B. O. Curry and family were tourists in the Big Basin Wednesday.

A fine enlargement free with Kodak coupons. See Smith about them.

Mrs. Emily Gard went to San Francisco Sunday to spend a week with friends.

Miss Elizabeth Sargent of Hamilton Ave. has returned to Oakland to resume her school work.

You should see that "Rosepoint Initial" stationery at Smith's. It makes a most acceptable gift.

Wizard Fertilizer is for lawns, flowers, gardens, shrubs, houseplants, orchards and fields. Ferns love it.

Kodak finishing is Hulse's specialty. Have your favorite pictures enlarged free. Smith's Stationery Store is Campbell agent.

P. J. Archibald of Soquel and Miss May Archibald of Rockford, Mass., are guests at the H. V. Archibald home on Johnson avenue.

D. H. Cramer returned Tuesday from his prospecting trip to Pahvant Valley, Utah. Mr. Cramer did not purchase any of the valley land, prefering this valley to that.

Mrs. Kinnear of Foochow, China, spoke before the Woman's Missionary society of the Congregational church on the missionary work in China, at the Manse yesterday afternoon.

Mr. and Mrs. R. W. Robinson of Berkeley are visiting Mr. and Mrs. C. J. Ludwig. Mr. Robinson recently underwent an operation for appendicitis and came down to recuperate in our sunshine.

Mrs. James Hyatt of Los Gatos road entertained in honor of Mr. Hyatt's birth day Friday at supper. Those present were, Mr. and Mrs. G.S. Drew and Miss Likens of San Jose, and Miss Hill of Lodi.

Weatherbird! Weatherbird! Rah! Rah! Rah! Solid Leather! Solid Leather! Yes they are! These solid leather school shoes for boys and girls can be bought at the Campbell Cash Shoe Store at the very lowest cash price.

Luther Willetts and family came over from Modesto last week for a visit with relatives, Mrs. Chas. Sutter, and the W. C. Cutting and F. E. Duncan families, and to renew old acquaintinces. Mr. Willetts was a former resident here.

The Geo. B. Cowles family returned from Pacific Grove Friday where they had been enjoying a delightful vacation by the sea. Their reception on returning was quite warm, Friday, Saturday and Sunday being our hottest days this year. The family is spending this week at the Exposition.

The Country Woman's Club will reopen its meetings with a picnic at Mrs. L. F. Shaw's home on Johnson Ave., Sept. 6. Picnic lunch at noon. All members are urged to be present. The club hopes to welcome a number of new members this year. Mrs. J. F. Duncan and Mrs. Harry Bean constitute the membership committee.

The Rev. Geo. E. Atkinson has been elected as a member of the directors board of Congregational churches, and member of the executive committee of the state board, and Mr. Geo. N. Stray elected member of the state board and one of the directors of the ministerial relief society. Campbell has fared well in the way of committee jobs.

Prof. Snow will be in his office at the high school this Friday and Saturday afternoon and evening, and all day Monday, Sept. 6, for registration of students. No classes meet until Sept. 13, but the schedule of recitations will be made out from the registrations, and no changes will be made for those registering later. Those who have certain courses they wish to take or need in order to graduate should not fail to register on those dates. It need occupy but a few minutes.

Pupil Recital

Mrs. Emily Gard had a little recital Thursday afternoon last for her younger pupils. The mothers of the children only were invited as this was their "maiden effort." Those who took part were Elva Crawford, Marion Smith, Eva Bulmore, Wilma Smith, Pauline Blaine, and Ruby Reynolds, and they all performed to the satisfaction of their instructor.

After the music, an interesting musical story was read and a music game, similar to the familiar "donkey's tail," was played. Refreshments of punch and wafers were served and both entertainers and guests enjoyed a very pleasant afternoon.

Hi Studie...

The C. U. H. S. v... with several change... rangement of work ... courses. The teac... jects follow:

tory.
" McGuire—Englis...
" Weaver—A course...
" Johnson—Drawing;...
Mr. Cramer—Mathemati...
Mr. Zeidler—Botany, Ph...
Mr. Arnott—Manual Train...

Miss Thurlow, who takes ... classes during her leave o... taught at El Centro the past year.

Miss Weaver lives in the Willows, ... Jose, and is a teacher of several years experience, having been at Morgan Hill and Los Gatos.

The Manual Training work will be conducted along different lines this year, being under the charge of Mr. Arnott of Sunnyside, a carpenter and shop man for many years.

Beginning the year the work will be construction, the erection of the new manual training building, a frame structure 24x60, similar in exterior to the present edifice. Later, the working equipment, benches, lathes, etc. as far as practicable, will be built.

Then, interior finishing will be completed, and later those who desire can make articles for themselves. If there are any girls registered they will work entirely along previous lines.

The plan projected for next year, if there is sufficient demand, calls for another building, in which simpler blacksmithing and iron work will be conducted, especially in regard to care and repair of farm implements.

A Big Day for California Settlers

A Big get-together day is underway for the Old Settlers of California. It will take place at the Panama-Pacific Exposition on OCTOBER 16TH, the day set apart for them by the Directors of the Exposition. No more interesting event can be imagined than this will be, where thousands of the Old Timers are gathered together to celebrate at a great world's exposition, made possible by their early toils and privations. A proud day for them all, adding to their well spent lives yet a few more years.

We want every Pioneer and Old Settler to come. Do not miss this event. Those of you in this section who can come are requested to send your names and addresses to the Pioneer and Old Settlers Day Committee at San Jose. The Committee will arrange an excellent program for the day. It is suggested that there be an automobile parade through the streets of San Francisco twenty miles long. The committee will try and arrange it.

Mark the day on your calendar—October 16th—and make arrangements to be there. For any further information address,

PIONEER AND OLD SETTLERS DAY COMMITTEE, SAN JOSE, CAL.

California; Yes, It's Some State

An exposition visitor who recently returned from California, when asked what he thought of the Golden State and his impressions of the same, replied in the following not altogether complimentary terms:

"The Californian gets up at the ring of a Connecticut clock; buttons his Chicago suspenders to Detroit overalls; washes his face with Cincinnati soap in a Pennsylvania pan; sits down to a Grand Rapids table; eats Kansas wheat with Kansas peas cooked with Indiana lard on a St. Louis stove; puts a New York bridle on a Colorado bronco, fed on Iowa corn; plows a five acre farm covered by an Ohio mortgage, with a Chattanooga plow; when bed time comes he reads a chapter from a Bible printed in Boston, says a prayer written in Jerusalem, crawls under a blanket made in New Jersey, only to be kept awake by sand fleas, the only home product on his place."—*Ex.*

Contributed by an easterner who loves the famous California fruits and delightful climate, and is working day and night to save up railroad fare to bring him to this glorious state. We know his thots afar and off hope he may yet win out and come to live near us.

Busy Time.

We are agents for "Non-Smut" transfer papers, for transferring patterns upon linen, silks and satins for embroidery, on glass and china for painting, and on wood and leather for pyrography work. Will not smudge.

How the Surgeon Uses a Periscope For Looking Into a Man's Stomach.

of that organ before deciding whether it is necessary to perform an operation or not. To see the inside of the stomach he makes use of a miniature periscope, similar in everything but size to that through which the commander of a submarine gets his bearings.

This instrument in its perfected form is described and illustrated by the Electrical Experimenter. It is a metal tube of small caliber containing an arrangement of mirrors and lenses and having a small electric light at the end. This is pushed down the throat of the patient. The light is turned on and the instrument is moved about until every part of the inner surface has been examined.

The mirrors and lighting arrangement leave enough space in the tube for fine scalpels and forceps and scissors to be passed down through it. Thus the surgeon is able sometimes to perform delicate operations through the tube and without cutting into the patient's abdomen. To the outer end of the instrument rubber bulbs are attached, and these are used for various purposes according to the needs of the case.

Secrets and Unravelers.

During the last few months the submarine cables have been particularly busy carrying secret messages between the various governments. Every government has its own particular forms of cipher specially composed for it by experts. The cipher is, however, only a defective method of securing secrecy, none having yet been concocted to baffle the cipher unraveller. During the Spanish-American war the Americans appeared to the Spanish to be peculiarly lax in allowing a certain cable used by them to remain unchecked. They poured cipher messages through, and they were duly received and acknowledged by their agents. The senders and recipients little dreamt that every message sent to the cable passed first through American hands and was read by them. The supposed secret messages led to operations that, to the surprise of the Spanish, were foiled in a disastrous manner.

To Translate Old Book on Texas.

The only existing copy of "Texas in the Year of 1848," written in German, by Victor Bracht, one of the early German settlers, who came to Texas in 1845, was loaned to R. P. Bracht, son of the author of the book, by the state library. Mr. Bracht, says the San Antonio Light, wishes to have a translation made.

Victor Bracht came to Texas in 1845 with the Prince Solms-Braunfels colony to New Braunfels, and it is of this early period that the book is written. It tells of the life among the colonists and the opinion of the new land. Mr. Bracht was living in Mexico when Maximilian was emperor and knew that unfortunate ruler and his unhappy wife.

Potash in the Philippines.

It has been found that the ash of the seaweed collected on the shore of Manila bay in Tondo yields 15 per cent of potash. This discovery has aroused considerable interest, owing to the war time scarcity of seaweed available, but it is known in a general way that it is abundant. Explorations and further experimentation will be conducted by the government.

If there is one thing in the world more becoming than all others, it is the white fur neckpiece. In spite of the calendar and with or without the consent of the thermometer, this neckpiece has flourished through July and shows an undiminished head in August. Its vogue probably came about through the chilly weather in the early summer at San Francisco. All the gay world having journeyed thither, found a fur neckpiece comfortable. All the world recognized the becomingness of white fur and took heart at its appearance in the month of roses to make a vogue for summer furs.

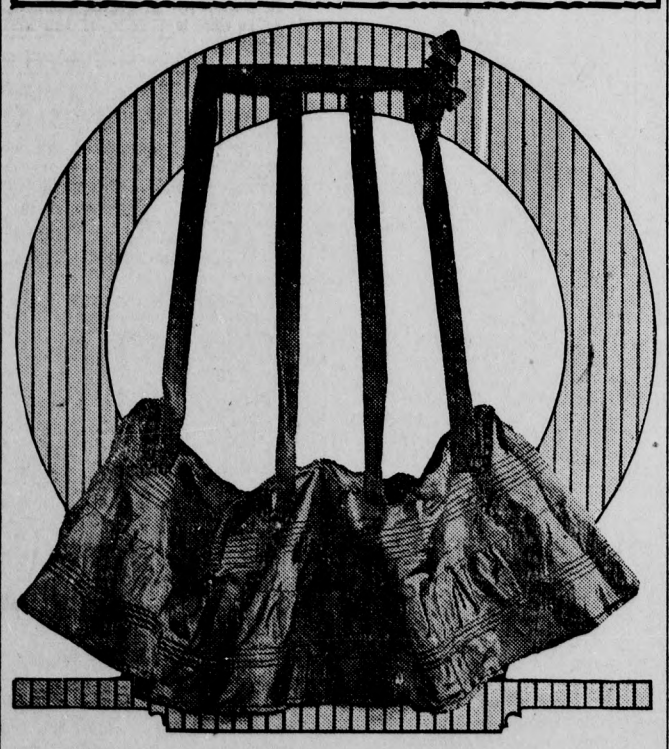
Let us be thankful that the majority of the neckpieces with which the wayward devotees of fashion have chosen to bedeck themselves are not really of white fox. They are as far from the fox as the goat is, or the Belgian hare, or whatever else those clever manipulators of skins know how to fashion into things of beauty. There would surely be few foxes left if every white neckpiece cost the life of one.

These summer furs are worn with white turbans or small white hats, with best effect, although they appear with all other midsummer millinery. In the picture a turban of white satin supports a frill about the crown which gives it the appearance of a Tam-o'-Shanter. At the left it is decorated with a bead ornament. The hat, the neckpiece, and the dress of cross-bar taffeta, made up with plain taffeta, are all forerunners of fashion and reliable indications of the coming mode.

However unreasonable it may appear for the fair wearer of fur to cling to it where no keen wind blows, she may be excused. A white fur neckpiece is really a good investment. The opportunities for wearing it stretch through this summer to the coming winter and to other winters beyond. White furs, especially for youth, will be good style, at least as long as any furs continue to be good style.

JULIA BOTTOMLEY.

The Skeleton Petticoat



A flounce suspended by ribbons, to be worn in place of a silk petticoat, is the very latest device for comfort and style. Everyone wants the fashionable flare at the bottom of skirts, and everyone likes the elegance of silk in petticoats. But no one wants added warmth about the body, or bulk about the hips, and here is the solution to the flare without anything else to hamper its wearer.

The skeleton petticoat is merely a more or less fancy and fluffy flounce of silk suspended by ribbons from a ribbon belt. The very practical one shown in the picture is made of bright green taffeta silk. Eight lengths of green taffeta ribbon suspend it from a belt of the same ribbon which ties in a small bow about the waist. This is a good color to wear with almost any street gown.

A petticoat of this kind to be worn with lingerie gowns is made of white taffeta in a flounce having decorations of figured taffeta. The figured taffeta—usually a flowered pattern on a white ground—is cut in strips two inches wide and "pinked" along each edge. These strips are sewed together and plaited into very full box plaits to form a narrow ruching. This is sewed in festoons to the white flounce.

The belt is made by covering a flat elastic cord with narrow taffeta ribbon shirred over it. The ribbons suspending the flounce are sewed to this belt and to the flounce. No fastening is required, as the elastic cord holds the petticoat in place about the waist.

A similar petticoat is made of light shell-pink taffeta and satin ribbon, with narrow ruffles of the ribbon set on the flounce in three overlapping rows. The ways of developing the flounce with ribbon and lace decorations are innumerable.

This petticoat will commend itself to the stout woman especially, and to anyone who wishes to be as lightly clothed in warm weather as it is possible to be.

JULIA BOTTOMLEY.

Erect Figure Correct.

The fashionable girl of 1915 appears on the scene with a beautiful, erect figure, a free swing to her walk and with clothing of sufficient width to permit her to be graceful in her carriage. The stooped shoulders with head bent forward and slouching gait, once assumed by those who wanted to attain the extreme in styles, have entirely passed and, like an old-fashioned dress of several seasons ago, will be discarded by those who care enough for fashion to change their manner of carrying themselves.

HELP FOR POTATO GROWERS

Finest of Tubers May Be Grown With the Aid of Embalming Fluid, Experiments Show.

It seems very curious that a chemical extensively used to preserve the dead in the way of an embalming fluid could be successfully used as a help toward growing good potatoes, but such is the case, remarks an exchange.

It has been found that a proper solution of formaldehyde will insure a most excellent crop of the finest potatoes, where it has formerly been quite difficult to make certain soil grow anything but a very inferior crop.

To prevent scabby or rusty-appearing potatoes, the potatoes to be planted should be soaked for two hours in a solution composed of one pint of pure formaldehyde to 50 gallons of water.

It may be placed in large tubs, and the potatoes put in burlap sacks and laid in the liquid for a couple of hours, and then spread out on clean grass to dry for an hour or more before cutting and planting.

The potatoes should be cut into pieces having two or more eyes from which to sprout.

One good plan where a number of bushels of potatoes are to be planted is to have the liquid in barrels, with spigot at the bottom for drawing off liquid.

Potatoes should not be gathered up, after being treated, in the same sacks or baskets they were in prior to being soaked, as they are apt to be reinfected more or less by the disease which is being fought.

In certain localities the potato has become so diseased it is almost impossible to secure pure healthy seed and this formaldehyde process is remedying the difficulty largely.

NATION HAD EXALTED IDEAS

Pyramids and Temples of Early Mexican Race Reveal Much to Student of Religion.

Religion and superstition are much combined in the mind of the Mexicans, the result of both ancient and modern creeds. As to the antique beliefs and cult, there is much that appeals to the philosopher in the religious structures and history of the prehistoric, semi-civilized peoples of Mexico, or indeed of Spanish-America, whether North or South.

The pyramids and temples which the Toltecs and the Aztecs and the Incas built have something grand and broad underlying their main idea, the idea of being able to get on their temples rather than in them.

There is ever a source of inspiration in being upon the point of an eminence, to commune with providence, rather than being immured within some gloomy walls, with toppling spires overhead. The spirit ever tries to get out, to ascend, and is exalted in accordance with its altitude.

Did not Moses at Sinai bring forth the enduring Decalogue from the summit of a great natural pyramid, rather than from the gloomy interior of a temple?

The exceedingly numerous pyramids throughout ancient Mexico seem to attest some exalted idea of a natural religion which found outlet and habitation in the great Teocallis.—New York Telegram.

An American.

A native of any part of North or South America is literally an American, since he is a native of one of the American continents. Usage, however, has narrowed the term so that "an American" is generally understood to be a citizen or native of the United States of America, while a native of Canada, Mexico, Central or South America is known as a "Canadian," "Mexican," "Brazilian," "Guatemalan," or the like. The reason for the usage does not lie in any feeling that the United States preempts, stands for, or overshadows the other parts of the western hemisphere, but simply in the fact that, while Canada, Mexico, Brazil, the United States of Colombia, etc., are words which admit of adjective formation, "American" is the only adjective which can be formed from the name of our country to denote its citizens or to apply to its interests, industries, cities, etc.

Wise Precaution.

Very few people are ambidextrous; that is, able to use the left hand as readily and skillfully as the right. But there is an amusing story of one Irishman who was careful to cultivate that art. When he was signing articles on board a ship he began to sign his name with his right hand, and then changed the pen to his left hand, and finished it.

"So you can write with either hand, Pat?" asked the officer.

"Yis, sorr," replied Pat. "Whin I was a buoy me father (rest his soul!) always said to me, 'Pat, learn to cut yer finger nails wid yer left hand, for some day ye might lose yer right!"—Youth's Companion.

Blessing in Disguise.

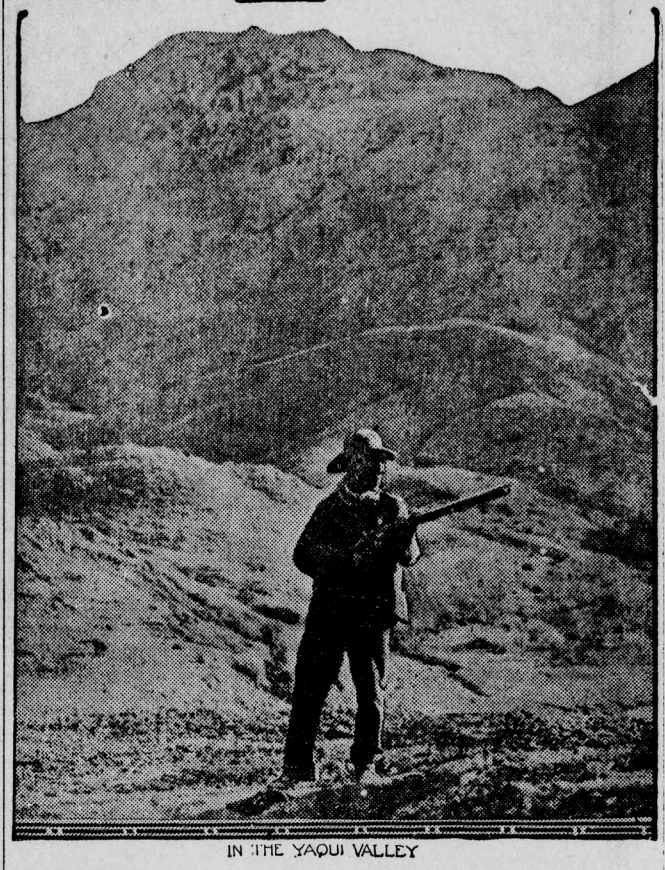
"I don't see any billboards about here," said the visitor. "Do the residents object to that kind of advertising?"

"Yes, but their wishes in the matter had nothing to do with the disappearance of billboards hereabouts," said the Kansas man. "We have providence to thank for that."

"I don't understand."

"Well, every time we accumulate a flock of billboards a cyclone comes along and scatters them over six or seven counties."

The YAQUI and HIS LAND



IN THE YAQUI VALLEY

MORE deadly than the deadliest Mauser and as swift as a German Zeppelin are the poisoned arrows of the Yaqui Indians, against whom the Mexicans have waged relentless war for more than a century, says the Boston Transcript.

Yaqui bows are made of black palm wood, which is extraordinarily hard; the arrows are long and sharp and so poisoned as to cause certain death in from three to seven days, but only after the most horrible torture, during which the patient raves, eats and gnaws his own flesh, beats his head against the wall or ground and so dies.

No antidote for the poison has ever been discovered. According to an old Spanish record, early settlers in Mexico tried by promises and threats to persuade the Indians to give them a recipe for it, but could not prevail until they had wounded a Yaqui they had taken, and then gave him liberty to go abroad to seek his remedy. They observed that he gathered two herbs, which he stamped and pounded severally, drank the juice of one, and injected the other into his wound; but first he opened the wound and drew out the barbs of the arrow, which, infinitesimally fine and thin, are left in the flesh after the shaft is taken out; for unless the wound be first cleared thereof, the herb can have no effect. In this manner the Indian cured himself, but the novice has had only varying results, as none but the Indian knows the art of clearing the wound. "They cumber the earth," said Lord Amherst on a certain memorable occasion of our own truculent Senecas. "They cumber the earth," said his excellency, President Diaz, when speaking of the Yaquis. So the unwritten edict went forth that the Yaquis should be exterminated, after they proved refractory to all softening influences of civilization.

Don't Like Americans.

Being unable to either civilize or exterminate them after nearly a century of endeavor, Mexico graciously sold to Americans almost exclusively mining and other concessions within the disputed territory, a fact which probably accounts for the Yaquis' sudden "change of heart" towards Americans. Indeed, until within the past fifteen years, a visit to the Yaquis was considered an interesting and by no means hazardous excursion by the younger men of our navy while cruising or surveying in the Gulf of California. The Yaquis would always receive their visitors with perfect Indian hospitality, regale them with the best they had and show them excellent shooting.

The only descriptions we have of the coast villages of the coast tribes, situated as they are amid swamps and lagoons which render them well-nigh inaccessible, are due to the accounts which the jolly sailor boys have left of their outings on shore. Curiously enough also, the armistices which have been concluded and the attempts which have been made from time to time to make peace between the Mexican government and the Yaquis have nearly always been initiated and carried on by American adventurers and prospectors across the border, the Yaquis refusing consistently to admit Mexicans within their villages, even when they came suing for peace and bringing presents.

The strongholds of the Yaqui valley and the fastnesses of the Sierra which they are defending with such stubborn valor as to command the admiration of the Mexican officers who have had to fight them are full of copper mines and deposits of other precious ores, attractive to the commercial spirit of the age, and the present era of ill-feeling against the American settlers there is undoubtedly due to what the Yaquis regard as unwarranted trespassing upon their domain, since they cannot read and do not recognize the Mexican rulers' right to sell mining and other concessions within the territory which that government has never conquered. Another reason for the cooling off of friendly relations between our navy and the Yaquis is that on several occasions in the course of the revolutions that have been going on for so long Americans have permitted Mexican generals to secure strategic advantages by transporting their troops over our territory from El Paso to Nogales. How great a factor this is in the present situation can best be understood by those who know the Yaquis—not one of whom has ever turned traitor, though every one of them, from the moment of his capture to the day of his execution by the Mexican authorities, has been tempted to betray his tribe with offers of gold, invaluable treasures, and life itself. With few exceptions, all the prisoners taken by the government since the war with the Yaquis began in 1825 have been butchered.

All Stubborn Fighters.

As far back as the days of Montezuma the Yaquis were famous for their running prowess, and a corps of them is said to have been retained to bring from the "Vermilion Seas," as the Pacific was called by the Aztecs, fresh fish from the shores of the hot country to the capital on the temperate tablelands, and if the old Spanish chronicles can be relied upon, it would seem that, thanks to the relays of fleet-footed Yaquis, Montezuma was able to get fresher fish than did the residents of Mexico City in the days of their greatest prosperity, civilization and railroads, in the regime of General Diaz.

The Yaqui warrior is a noble figure. His free and open gait is like that of an Olympian victor carrying off the prize, rather than the lope of our own redskin.

Besides being a stubborn fighter and swift runner, the Yaqui is a sturdy worker, though it would seem that they work not to amass wealth but ammunition. They are splendid agriculturists and expert pearl divers, not hesitating even with the most primitive weapons to grapple with a man-eating shark 30 feet beneath the surface of the pleasant-looking but dangerous waters of the Gulf.

There is no organization among the Yaquis except that part of the tribe that lives practically free and conducts the warfare. This hostile contingent recognizes rule by the elders, who in turn are elected for a single campaign. In the effort to punish the Yaqui depredations in the past two decades, thousands of Mexican troops have been killed and wounded and yet not one Yaqui stronghold has ever been captured.

From time to time for nearly a century it has been reported that the Yaquis have been quelled by the Mexicans, but that is only because the Yaqui ammunition gave out. They replenished their ammunition and were ready to renew the warfare again.

When preparing for battle the Yaqui have a way of digging round holes in which they plant poisoned arrows, lightly covered with leaves and a little earth on top, then trapping the enemy to this unique torpedo bed.

WOMEN WHO ARE ALWAYS TIRED

May Find Help in This Letter.

Swan Creek, Mich.—"I cannot speak too highly of your medicine. When

through neglect or overwork I get run down and my appetite is poor and I have that weak, languid, always tired feeling, I get a bottle of Lydia E. Pinkham's Vegetable Compound, and it builds me up, gives me strength, and restores me to perfect health again. It is truly a great blessing to women, and I cannot speak too highly of it. I take pleasure in recommending it to others."—Mrs. ANNIE CAMERON, R.F.D., No. 1, Swan Creek, Michigan.

Another Sufferer Relieved.

Hebron, Me.—"Before taking your remedies I was all run down, discouraged and had female weakness. I took Lydia E. Pinkham's Vegetable Compound and used the Sanative Wash, and find today that I am an entirely new woman, ready and willing to do my housework now, where before taking your medicine it was a dread. I try to impress upon the minds of all ailing women I meet the benefits they can derive from your medicines."—Mrs. CHARLES ROWE, Kennebago, Maine.

If you want special advice write to Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass. Your letter wil be opened, read and answered by a woman and held in strict confidence.

Told the Truth.

A Boston physician tells of a Dr. Reed, who, in his time, was one of the prominent medicos of the Hub. His large practice included many patients outside the city limits, and these he visited in his buggy.

One day Dr. Reed bought a new horse, with which he was much pleased until he discovered that the animal had an insurmountable objection to bridges of all kinds and could not be made to cross one.

Inasmuch as at that period it was necessary to cross certain bridges in order to reach any one of the surrounding towns, the doctor decided to sell the horse. He did not think it necessary to mention the animal's peculiarity, but was much too honest to misrepresent him, and, after some thought, produced the following advertisement, which he inserted in a local paper:

"For Sale—A bay horse, warranted sound and kind. The only reason for selling is because the owner is obliged to leave Boston."—Pittsburg Chronicle-Telegraph.

YOU CAN CURE THAT BACKACHE. Pain along the back, dizziness, headache and general langour. Get a package of MOTHER GRAY'S AROMATIC LEAF, the pleasant root and herb cure for all Kidney, Bladder and Urinary troubles. Perfectly Dry Now.

A stranded but still haughty "leading lady" was obliged to put up at a dilapidated country hotel. She glanced frowningly about the office, reluctantly signed the register and took the brass key from the proprietress.

"Is there water in my room?" she demanded.

"Why, there was," replied the proprietress. "There was, but I had the roof fixed."—Kansas City Times.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy to take.—Adv.

Valuable Knowledge Gained.

"Well, Freddie," said his mother, "did you learn anything new at school today?"

"Yes'm," said Freddie.

"What did you learn new?"

"I got on to a new way o' gettin' out o' school fer an hour by snuffin' red ink up me nose."—Ladies' Home Journal.

The Party Hypnotist.

"My party relies on me to raise the necessary campaign fund."

"How do they expect you to do that?"

"By keeping our candidate convinced that he has a chance for election."—Philadelphia Public Ledger.

Full Details.

"Have you seen a fellow around here with a wooden leg by the name of Murphy?"

"What's the name of his other leg?"—Christian Register.

TYPHOID is no more necessary than Smallpox. Army experience has demonstrated the almost miraculous efficacy, and harmlessness, of Antityphoid Vaccination. Be vaccinated NOW by your physician, you and your family. It is more vital than house insurance. Ask your physician, druggist, or send for "Have you had Typhoid?" telling of Typhoid Vaccine, results from use, and danger from Typhoid Carriers. THE CUTTER LABORATORY, BERKELEY, CAL. CAP and BELLS

S. CREW LOOSE WANTED WINE

Rich American Ordered Pint of Straussberger and Quart of Yenkelsbrau From Passenger List.

The Dinfillis was cutting merrily through the Bistongle strait.

"Waiter," ordered S. Crew Loose, looking critically over the card, "bring me a pint bottle of Straussberger and a quart of Yenkelsbrau."

"Y—Yes, sir," said the waiter, uneasily.

Now on all ships of the East Polish Lloyd line the orders are to produce whatever the passengers demand, so the waiter rushed to the portlight kitchenette, where the steward was.

"That rich American wants some wines that we don't carry—Straussberger and Yenkelsbrau!" he panted. "What shall I do? He says they're on the wine card."

"Straussberger and Yenkelsbrau? Never heard of 'em?" cried the steward, and rushed off to where the captain was pacing the belay deck.

"The rich American wants Straussberger and Yenkelsbrau wine?" he gasped. "The waiter said he read it off the wine card."

"Wine, you marine cuttlefish!" roared the captain. "The boob landlubber is reading the passenger list!"—Detroit Free Press.

Proved by Experiment.

One of the young ensigns who was acting as teacher on the battleship Texas asked the question, "What are the two principal parts of a sentence?" expecting to get the answer. "Subject and predicate."

An old salt scratched his head in perplexity and at last replied: "Solitary confinement and bread and water."—The Sailor's Magazine.

Musical Friends.

"My farewell appearance was an occasion of the greatest enthusiasm," said a well-known prima donna to another.

"Yes," replied the other. "Isn't it remarkable that such a large number of people should have seemed so delighted to hear you for the last time?"—Musical America.

The Feminine Financier.

"So she has broken the engagement! Did she give you back the diamond ring?"

"No; we are deadlocked. She says she will give me back the price I paid for it, but diamonds have doubled in value and that she is entitled to the profit."

ONE IN THE DARK.

Fortune Teller—Beware of a tall, dark man.

Miss—I hope you are not trying to black male me.

Association.

"A man is known by the company he keeps."

"Yes," replied Miss Cayenne, "and many are unknown by the company they pretend to keep."

A Warning.

"I think I'll try fish as a steady diet. They say it is good brain food."

"Then you'd better begin with weakfish and sheepshead."

The Ban.

"You look tired, Elise. I'm afraid this terrible war is telling on you."

"Yes; my doctors say I must positively stop attending any more Red Cross balls."—Life.

Not Always.

"People are always more interested in their own affairs than they are in their neighbors."

"It is easy to see you don't know our neighborhood."

WOULD "UNIONIZE THE MONK"

Court Fines Organ Grinder for Overtime and Cruelty to His Trained Simian.

Palo Alto, Cal.—At the instigation of Mrs. Isabelle C. Merriman, humane officer, John Samponi, Italian organ grinder, was arrested for alleged cruelty to a trained monkey.

Mrs. Merriman claimed that the monkey was jerked violently about in the hot sun and compelled to work 14 hours a day.

Evidence presented showed that Samponi had obtained a license from the city authorities and treated his monkey kindly, but the Italian was unable to prove that he did not make "Jocko" work from seven o'clock in the morning until eight at night, with an intermission of only two hours for rest.

Justice Charles imposed a $10 fine upon the organ grinder for not having unionized the monkey's hours of labor.

HOW TO HEAL STUBBORN TORMENTING SKIN DISEASES

A Baltimore doctor suggests this simple but reliable and inexpensive home treatment for people suffering with eczema, ringworm, heat-rash and similar itching, burning skin troubles.

At any reliable druggist's get a jar of resinol ointment and a cake of resinol soap. These will not cost a bit more than seventy-five cents. With the resinol soap and warm water bathe the affected parts thoroughly, until they are free from crusts and the skin is softened. Dry very gently, spread on a thin layer of the resinol ointment, and cover with a light bandage—if necessary to protect the clothing. This should be done twice a day. Usually the distressing itching and burning stop with the first treatment, and the skin soon becomes clear and healthy again.—Adv.

POODLE FED ON $2 STEAKS

Mrs. John Jacob Astor's Pet Dog Consumes Big Juicy Pieces of Meat.

New Haven, Conn.—Waiters at a local hotel told of the visit of Mrs. John Jacob Astor, formerly Miss Madeleine Force, on an automobile trip into New England. With Mrs. Astor was her pet poodle Mizzie, and inasmuch as she was unable to retain the dog at the hotel where she stopped, she sent Mizzie to another hostelry in care of the chauffeur.

The waiters were not surprised when the chauffeur ordered a $2 steak, but when he announced that it was to be cut up for Mizzie the serving man stood aghast. He complied with the order, nevertheless. Mizzie consumed the steak with the usual canine celerity and the waiter pocketed a good tip.

Figured It Out.

The Officer—Really, Smithers, your figures are awful. Just look at this 3; anyone would take it for a 5.

Smithers—It is a 5, sir.

The Officer—Good Lord! I would have sworn it was a 3.—London Sketch.

Those Clever Fakes.

'66—What a lovely ring; is it silver?

'16—No, platinum.

'66—You don't tell me! I thought it was real. What good imitations they do make nowadays.—Harvard Lampoon.

JUST A WORD ABOUT YOUR

HEALTH

If your health is poor as a result of a weak stomach, lazy liver or clogged bowels—

"I hope you do

"Oh, yes, I try. courtesy for neutr I keep my hat on all the woman oc keep to my seat never hold a door lady pass before r her handkerchief, I any more. In shor any little service I re ing it. I know she is a herself as well as any

"You rude boy! You the gallantry of your fa you, and I can only ask not ashamed of yourself!"—

Mysterious Disappearance.

"Queer thing happened on my plac last week," remarked Farmer Hoptoad. "Thought my hired man had disappeared."

"And hadn't he?"

"No. While he was sitting on a fence a vine grew over him. By heck, we like to never found him."

IN TIME TO COME.

First Aeronaut—How far did you go in your airship?

Second Aeronaut—Not far. I got into trouble. A fellow had me arrested for trespassing on his air.

Succinct Summary.

"Does your husband play poker?"

"He varies," replied young Mrs. Torkins. "Some evenings he plays the game and others he merely keeps putting in money for his friends to play for."

In Authority.

"Your boy said that when he got to town he was going to tell some o' those city folks where they get off."

"Well," replied Farmer Corntossel, "that's what he's doin'. He's conductor on a street car."

A Possible Substitute.

"What have you in the shape of cucumbers this morning?" asked one of our newly weds of a trukster at Five Points.

"Nothing but bananas, ma'am," was the reply.

Appropriate Serving.

"They say as dumb as an oyster, don't they?"

"Yes."

"Do you suppose that is one reason why they serve with oysters a wine that's Mumm?"

Quite Celestial.

"Mabel said she had a heavenly time."

"No wonder. She had a sunburst, several moonstones, was presented with a Skye terrier and was the star of the occasion."

The Great Desideratum.

"Did you see where some expert had achieved a seedless apple?"

"Yes, but life will not be altogether worth living until somebody has evolved the boneless shad."

Overlooking Something.

Cassidy (visiting warship)—Ivry time that big gun is fired, Dinny, sivin hundred dollars goes up in smoke.

Conley—Glory be! Why don't they use smokeless powder?—Puck.

The Difference.

"Men in the old times strove to get a lady's glove."

"Well?"

"Now they strive not to get the mitten."

Naturally.

"Women make a great mistake when they buy these high-heeled shoes."

"Well, as a matter of fact, they do put their feet in it."

An Exception.

"Nobody notices the little things in life."

"I differ with you. Do you know anything as small as a cinder which can be so much in the public eye?"

Classified.

Teacher—Children, can any one of you tell me if your fathers are mammals or invertebrates?

Pupil—Please, Miss Katie, my pop's a hard-shell Baptis'.

BIG LON

Great Cathedral at Wrecked by German S

Teuton Missiles Leave it a Venera Broken Twelfth Century Monument of Desolation—Town Is Practically Deserted.

By C. INMAN BARNARD.

Paris.—I made a flying visit to Soissons cathedral—or, rather, what is now left of this superb twelfth century edifice. I found the venerable Abbe Landais, vicar of the parish, standing broken-hearted amid the heaps of ruins, now and then seeking with trembling hands for a fragment of the ancient stained-glass window given by Blanche de Castille, but now lying shattered in piles of broken masonry, wreckage and dust.

In the roofless nave near three ogival doors, once the pride of Romanesque architecture, Abbe Landais greeted me with these words:

"This is a terrible misfortune. Not a single pane of the beautiful stained glass of the rosace windows nor of the side windows remains. It was only last Tuesday that an exquisite rosace, with its 12 rayons forming part of a tympanum of large stained glass, a structure of four divisions, was unharmed; but on Tuesday morning a German projectile smashed to atoms this last relic of the stained glass.

"The masterpieces of stained glass art were the crimson and blue portraits of Saint Louis and of Jeanne d'Arc in kneeling postures. These were demolished this week."

As one approaches Soissons posted notices announce "Road repaired. Proceed only at a walking pace. Make no dust." This reminds the visitors that the Germans are intrenched 700 yards away, on the right bank of the River Aisne, and they keep up a constant fire on Soissons, on the cathedral and on the ruins of the ancient abbey of Saint Jean des Vignes, where Thomas a Becket lived for nine years. The town of Soissons is deserted, except for a dozen inhabitants, who prefer to live in the cellars—all that is left of their houses.

The cathedral is a mere skeleton of massive arched buttresses which support nothing except shell-pierced walls. As one stands in what was once the nave the clear, open sky is seen, and occasionally a stray shell adds to the heaps of ruins. The famous antique portal on the south side no longer exists. The south tower and the spire stand as a sort of rugged, fragmentary monument of desolation.

Always Was.

"You see," said the country editor, "I have printed your poem."

"Thank you," responded the poet "I suppose I shall receive remuneration according to your usual tariff."

"Tariff? My good man, poetry is on the free list."—Kansas City Journal.

Otherwise Without.

"I wonder who it is that puts up the price of meat?"

"That's easy. The man who wants to get it."—Boston Transcript.

WIRE BURNS OFF GIRL'S HAND

Playing in Yard, She Receives Shock of 2,300 Volts—Father Also Seriously Shocked.

Chambersburg, Pa.—Tinners working on the roof of the Rosedale building here threw a board to the ground, which tore down an electric light circuit, carrying 2,300 volts. The live ends of the wires fell into the yard of Harry Alexander. His daughter, Clara, aged seven, took hold of one side of the broken circuit. Her father pulled her away, being himself seriously shocked.

The child's right hand was burned away and she was rendered unconscious. Electricians say that but for the fact that she stood on a solid concrete walk she would have been killed instantly.

A Human Churn

"WHEN the food reaches the stomach it is subjected to a peculiar churning movement by the muscular walls of the stomach"—(See Dr. Pierce's Medical Adviser, page 45). In the liver, kidneys and skin, the blood is purified of its waste materials—these organs act as human filters, leaving the blood pure and clear—unless liver, digestive tract and kidneys are clogged.

Dr. Pierce's Golden Medical Discovery

is a stomach, liver and kidney tonic—by assisting the stomach to assimilate, the liver to filter, the kidneys to act—the poisons are removed, the red blood corpuscles are increased and one feels light, fresh and active instead of logy, dull and heavy. The "Discovery" stimulates the stomach, increases action of heart and arteries and is a most satisfactory alterative in blood-taint of any character. The refreshing influence of this extract of native medicinal plants has been favorably known for over forty years. Everywhere some neighbor can tell you of the good it has done.

Sold by all medicine dealers in liquid or tablet form; or send 50 one-cent stamps to Dr. V. M. PIERCE, Buffalo, N. Y., a trial box will be mailed you.

Notice of Time Set for Probate of Will

In the Superior Court of the County of Santa Clara, State of California:

In the Matter of the Estate of WILLIAM H. HINDE, Deceased.

A document purporting to be the last Will and Testament of William H. Hinde, Deceased, having on the 31st day of August, A.D. 1915, come into the possession of said Superior Court, and a petition for the probate thereof and for the issuance of Letters Testamentary to Jane R. Hinde having been filed by said petitioner with me, the Clerk of said Court, notice is hereby given that Friday, the 17th day of September, A.D. 1915, at 10 o'clock A. M. of said day in Department 2 at the Court room of said Court, at the Court House, in the City of San Jose, in the County of Santa Clara, has been set as the time and place for proving the will of said William H. Hinde, deceased, and for hearing the application of said petitioner for the issuance to her of Letters Testamentary when and where any person interested may appear and contest the same.

Given under my hand and the Seal of said Superior Court this 31st day of August, 1915.

Henry A. Pfister, Clerk.
By W. Denker, Deputy Clerk.

L. D. Bohnett, Attorney for Petitioner

The Sacrifice Hit

[illegible] is good baseball. Given a man on first base, [illegible]wn a slow teasing bunt. It takes the third baseman to it and throw it to first in time to nip the batter. [illegible]is over the runner from first is safe on second [illegible]hit will score his run. The sacrifice is one of the [illegible]ngs in baseball. But it retires the batter at first. [illegible]ation on the score sheet. The other man scores the

[illegible]t the only game where the score stands on a sacrifice. [illegible] woman wearing a 2-year-old hat while her daughter [illegible]othed to school, remember that girl is being advanced [illegible]ifice hit. When father stays home from a vacation [illegible]eds badly in order that some new comfort can be ad- [illegible]or that the boy can graduate with his class, or for half [illegible]reasons, he lays down a bunt which advances the boy [illegible] to score. In one way and another the "sacrifice" is [illegible]ll thru the big game which is going on about us. [illegible]s a son or a daughter, usually a father or mother, or [illegible] at first on a sacrifice.

[illegible]ood play. It wins games but a bunt needs an alert runner [illegible] A "sacrifice" with a careless man or a bonehead on first [illegible]h much. The object is to advance the runner. If he is slow, [illegible]careless it means a double play and two men out, and the sacri- [illegible]as worse than useless.

Say, you boy, whose parents are sacrificing for you, get up on your toes and stay there! Take a lead! Go down with his arm! Slide, you terrier, slide! Why do you suppose a strong batter is voluntarily throwing a life away at first, throwing away his personal chance, except to put you on second whence a hit would bring you home? Suppose you did skin your leg? Get upon that base and watch for a chance to take third! Ginger, blame you! ginger! Get "pep" in your play and watch the pitcher. Justify the "sacrifice."—*Farmer*, Great Falls, Mont.

An Expensive Election

AT AN expense approximating three-quarters of a million dollars, the people of this State, on October 26th next, will indulge themselves in the luxury of direct "legislation."

We trust it will be enjoyed, for this particular election has in it no element of utility, and it comes high.

One thing which will not be enjoyed by the few who will attempt it will be the reading of the ridiculous pamphlet purporting to define the issues and explain them to voters.

The pamphlet contains sixty odd pages of small type closely packed in, of which five pages are in type so small that it cannot be read without a magnifier.

At the beginning is printed in full the so-called nonpartisan act, with the heading worded with intent to deceive, for it begins by stating that certain officers shall be "partisan," evidently in the belief—very likely well founded—that that is as far as the elector will read.

An honest machine would have made prominent in the heading that the intent of the law was to deprive political parties of the right to have their candidates named as such on the official ballot, except as to those officers.

Concealment of the real intent of the law in the heading with the knowledge that not one voter in a thousand will read the law is conclusive evidence that the advocates of the measure do not dare to expose their bantling in its nakedness.

A companion measure, to change the form of the ballot, will occupy the second place on the ballot, and should be killed with the nonpartisan law itself, of which it is really a part.

In fact, it seems to have been prepared in the expectation that the main act would be killed, but the purpose accomplished by the approval of the second, owing to its apparently innocent title.—*Chronicle*.

[illegible] great op- [illegible]rations, now [illegible]e recent currency [illegible]mulate international [illegible] would tend to shift the [illegible]nter of the world to this [illegible] And America, by the logic [illegible]ts, has become the natural center of the world's financing, just as [illegible]don became that center several [illegible]nturies ago, when it shifted from the [illegible]cities of the Netherlands. But the financial center will only move to this country when it becomes a clearing house of goods as well as of money. For credit the world over is created by currently created wealth in transit or change so that even our financial expansion is dependent upon the opening up of American ports to the clearance of the wealth of the world. A port should not operate to yield a return on the investment, but to develop the prosperity of the country." In recapitulating the advantages, Mr. Howe brings out the importance of the free port in developing our shipping, and linking us with South America, Asia and Africa, and then concludes:

"The most important gain is the direct gain to America. It will cheapen commodities by bringing great quantities of goods to our doors for importation or export, as trade needs demand. It will stimulate the growth of exporting houses, which can hold goods for an indefinite period without the payment of tariff dues (often equal to the cost of the article itself) for disposal to meet the trade demands of the whole world. It will upbuild international credit, and shift to America an increasing and ultimately a predominant share in international exchange.

"Finally, America is the natural country to be the counter of the world. Its seacoasts face every other continent; it is the greatest of all reservoirs of raw materials and foodstuffs. In iron and steel and standardized production it is in a position to compete with the world. But international trade (and this is always overlooked) must be reciprocal. It cannot be one-sided, and credit balances cannot for any prolonged period be paid in gold. They can only be paid by exchange of wealth."

Hampton Quartet

The Hampton Jubilee quartet was greeted with a packed house Monday evening, when it appeared under the auspices of the Country Woman's Club. Mrs. Ellen R. Smith, on behalf of the Club expressed their thanks for the generous attendance.

Mr. Dodd, one of the Hampton faculty, gave a very interesting account, illustrated with stereopticon slides of a trip to Hampton Roads, and a plea for help in their work. He explained briefly the origin and perpetuation of the negro melodies.

The quartet sang several beautiful melodies, most of which were new to their audience. Every one was very enthusiastic, and the quartet kindly responded to an encore at the close.

Genevieve Davis spent the week-end with friends at Mt. Hermon.

Miss Sadie Maxon was taken to San Francisco yesterday where she will remain for special treatment.

The Farmers Union Pkg. Co. will be open next week to receive fruit. A good season's run is expected.

Mr. and Mrs. G. C. Bradford and Mr. and Mrs. E. C. Merrill motored to the exposition city and spent last week-end sightseeing.

Mr. and Mrs. F. R. Glover and their son and wife, were taken to the Fair yesterday morning by A. B. Cheffers in his machine. They will spend the remainder of the week in the city, Mr. and Mrs. Walter Glover returning from there to their home in Redlands.

Described In Detail

"What did Joan of Arc wear?" "She wore," answered the girl at the foot of the class, "a suit of steel trimmed with sheet iron and cut along rather severe lines."—Louisville Courier-Journal.

Local and Personal

"Winter has came and the days grow cold."

Wizard Fertilizer is odorless, neat, clear—you get results. It's guaranteed.

W. C. T. U. will meet with Mrs. Geo. E. Atkinson at the Manse Wednesday afternoon, Sept. 8.

Wizard Fertilizer comes only in 25lb. white cotton bags at $1.50, and two pound packages at 25c.

Mr. and Mrs. Gilmore McCaughey and daughter, Alice, are spending the week at Camp Campbell. Arthur Robinson and son were with them the forepart of the week.

Mrs. Denbigh and children who have spent the vacation here returned to Berkeley this week for the opening of school. Mrs. Denbigh is sorry to leave Campbell as she prefers living here to the city.

Miss Lucie Vandergon and Miss Appleby, a former high school student here, left Friday for Dunsmuir to attend the county teachers' institute. Miss Vandergon will teach in Weed and Miss Appleby near there.

Miss Vaudine Putnam, post-graduate of College of Pacific in Elocution, has been selected to assist in this department of the college for the ensuing term. Miss Putnam is an enthusiastic worker for the school, and will continue her studies in the regular college course.

Talking about the dangers of a pedestrian on our avenues on account of the reckless driving of motor machines, J. E. Olds, who formerly enjoyed his evening constitutional on the highway near his home, has taken to walking on the railroad track, saying that it is much safer.

Mrs. M. J. Palmer is at home after a busy week in San Jose, and is entertaining her brother, Chas. Brady of Shelbina, Mo., and Mr. and Mrs. W. L. Bowles of Gustine who returned with Mr. and Mrs E. R. Kennedy on their trip to Livingston. Mrs. J. Bryant and daughter of West Point, Ill., were also here a couple of days between visits at the Expositions.

Methodist Church Notes

At the meeting of the Official Board Wednesday evening, the following were elected delegates to the Lay Association of the California Annual Conference: W. H. Stuart, N. G. Finley, Mrs. R. W. Kennedy, and Frank S. Graves. The Annual Conference meets this year at Howard St. church, San Francisco, Wednesday morning, Sept. 15, and will continue in session until the following Tuesday. The Lay Association will meet at the same place Friday, Sept. 17.

We have our fourth and last Communion Service for the year Sunday morning.

Brother C. P. Herrington will lead the League meeting Sunday evening.

It is highly important that any who have not yet taken care of subscriptions to the benevolences should give attention to the matter at once, so that our annual reports may be properly prepared in good season.

With the exception of Conference Sunday, Sept. 19th, we expect to have the usual evening service this month, the summer union services having come to an end. This being Labor Sunday, the pastor will speak in the evening on "The Bible and Labor." Mr. Tracy R. Plant, instructor on the violin, will be with us for the evening, playing the following numbers: Minuette—Beethoven, in the League meeting, Ave Maria—Schubert-Wilhelmj, and La Serenade—Pieme', in the evening service.

The Sunday-school Board will omit the September meeting.

The S. P. will run a special excursion train thru Campbell to Santa Cruz at 7:38 a. m., Sunday, leaving Santa Cruz at 7:30 p. m. to return. One way fare of $1.40 for the round trip.

Wm. Finnemore is building a cottage on his ranch bordering Los Gatos Creek, which he will occupy as soon as completed. The Ayres ranch, part of the V. M. Ayres estate, where he now lives has been sold and the owner, Mr. Snap, who came from Texas, will move out from San Jose as soon as the place is vacated.

September 13th

Is the time set for the beginning of school, and you should be prepared to attend.

HARRY C. SMITH

Ancient Sequoias

The Sequoia National Park is twenty-four years old, yet, east of the Rockies, it is scarcely known. Yellowstone and Yosemite are the only two names which the enormous majority of easterners think of when National Parks are mentioned. Nevertheless, Sequoia is, perhaps, in point of average beauty, the superior of all. It was dear to the heart of John Muir, Father of National Parks, and Chief Geographer R. B. Marshall, who knows them all as no other man knows them, having surveyed or traversed them in person, has declared in print that it possesses beauty as great as all others combined.

It is par excellence the camping-out park, as some day will be discovered.

The sequoias are the oldest living things in this world, "They are the connecting link," writes Ellsworth Huntington, "between the ancient East and the modern West."

"Three thousand fence posts, sufficient to support a wire fence around 8,000 or 9,000 acres, have been made from one of these giants, and that was only the first step toward using its huge carcass. Six hundred and fifty thousand shingles, enough to cover the roofs of seventy or eighty houses, formed the second item of its product. Finally there still remained hundreds of cords of firewood which no one could use because of the prohibitive expense of hauling the wood out of the mountains. The upper third of the trunk and all the branches lie on the ground where they fell, not visibly rotting, for the wood is wonderfully enduring, but simply waiting till some foolish camper shall light a devastating fire.

"Huge as the sequoias are, their size is scarcely so wonderful as their age. A tree that has lived 500 years is still in its early youth; one that has rounded out 1,000 summers and winters is only in full maturity; and old age, the three score years and ten of the sequoias, does not come for seventeen or eighteen centuries.

Growing Before Exodus

"How old the oldest trees may be is not yet certain, but I have counted the rings of seventy-nine that were over 2,000 years of age, of three that were over 3,000, and of one that was 3,150.

"In the days of the Trojan War and of the exodus of the Hebrews from Egypt this oldest tree was a sturdy sapling, with stiff, prickly foliage like that of a cedar, but far more compressed. It was doubtless a graceful, sharply conical tree, twenty or thirty feet high, with dense, horizontal branches, the lower ones of which swept the ground. Like the young trees of to-day, the ancient sequoia and the clump of trees of similar age which grew close to it must have been a charming adornment of the landscape. By the time of Marathon the trees had lost the hard, sharp lines of youth, and were thoroughly mature. The lower branches had disappeared, up to a height of a hundred feet or more; the giant trunks were disclosed as bare, reddish columns covered with soft bark 6 inches or a foot in thickness; the upper branches had acquired a slightly drooping aspect; and the spicy foliage, far removed from the ground, had assumed a graceful, rounded appearance. Then for centuries, through the days of Rome, the Dark Ages, and all the period of the growth of European civilization, the ancient giants preserved the same appearance, strong and solid, but with a strangely attractive, approachable quality."

The Sequoias are found scattered all over the park, which has an area of 161,597 acres, but the greater trees are gathered in thirteen groups of many acres each, where they grow close together.

LEGAL

In the Superior of the State of California, in and for the County of Santa Clara

In the matter of the Estate of W. B. Evans, Deceased.) Order to Show) Cause Why Order) of Sale of Real Es-) tate Should Not Be) Made.

It appearing to the undersigned, Judge of said court, by the petition this day presented and filed by Robert T. Evans, the administrator of the estate of W. B. Evans, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of real estate, to pay the debts, expenses and charges of administration of said estate.

It Is Therefore Ordered by the undersigned Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on Friday, the 10th day of September, A.D. 1915, at 10 o'clock in the forenoon of said day, at the Courtroom of Department 2 of said Superior Court, at the Court House in San Jose, County of Santa Clara, to show cause why an order should not be granted to the said administrator to sell all of the real estate of the said deceased.

And that a copy of this order shall be published at least four successive weeks in the Campbell Interurban Press, a newspaper printed and pulished in said County.

I. R. Welch, Judge.

Dated August 6th, 1915.

L. D. Bohnett, Attorney for said Administrator.
